

SATHWIK GANJI

CLOUD & DEVOPS ENGINEER | AWS | TERRAFORM | KUBERNETES

ganjisathwik73@gmail.com | +91 9440547665 | Guntur, Andhra Pradesh, India

LinkedIn: linkedin.com/in/sathwik-ganji-a80b143b5/ | GitHub: github.com/sathwik-svg | Portfolio: portfolio-wuht.onrender.com

PROFESSIONAL SUMMARY

B.Tech Computer Science Engineering student with hands-on experience developing and deploying cloud, DevOps, Kubernetes and software engineering projects. Practical exposure to AWS, Terraform, Docker, Kubernetes, Helm, GitHub Actions, Linux, Git and modern web technologies through academic and independent engineering projects. Experienced in containerization, CI/CD, Kubernetes deployment, REST APIs and troubleshooting. Seeking graduate and junior opportunities in Cloud Engineering, DevOps and Platform Engineering, with a long-term focus on cloud architecture.

CLOUD & DEVOPS PROFESSIONAL SUMMARY

- Hands-on project experience with AWS, Docker, Kubernetes, Terraform, Helm and GitHub Actions.
- Created containerized application environments and deployed workloads using Kubernetes.
- Worked with Kubernetes Deployments, Services, configuration and container orchestration.
- Used Helm for Kubernetes application packaging and deployment.
- Implemented CI/CD workflows using GitHub Actions and Git-based source control.
- Worked with Linux/Ubuntu command-line tools and troubleshooting.
- Applied infrastructure-as-code concepts using Terraform.
- Developed APIs using FastAPI and Spring Boot and frontend applications using React/Vite.
- Worked with PostgreSQL and Redis in application environments.
- Practiced cloud deployment, troubleshooting, documentation and cloud-native architecture.

EDUCATION

BACHELOR OF TECHNOLOGY — COMPUTER SCIENCE & ENGINEERING

Vasireddy Venkatadri Institute of Technology (VVIT) | 2025–2029

Relevant Academic Areas: Data Structures & Algorithms • OOP • Operating Systems • Computer Networks • DBMS • Software Engineering • Computer Architecture • Compiler Design • Cryptography • Machine Learning • Web Development

TECHNICAL SUMMARY

Cloud & Infrastructure	AWS • Cloud Computing • Terraform • Infrastructure as Code
Containers & Orchestration	Docker • Kubernetes • Helm • Minikube
CI/CD & DevOps	GitHub Actions • CI/CD Pipelines • Deployment Automation • Git
Operating Systems	Linux • Ubuntu • Windows
Programming	Java • Python • JavaScript • C • TypeScript
Web & Backend	React • Vite • FastAPI • Spring Boot • REST APIs
Databases	PostgreSQL • Redis • SQL
Development Tools	Git • GitHub • VS Code • Docker CLI • kubectl • Helm

CLOUD & DEVOPS PROJECT EXPERIENCE

PROJECT #1 — AWS KUBERNETES CI/CD PLATFORM

Role: Cloud / DevOps Project Engineer | **Environment:** AWS • Kubernetes • Docker • GitHub Actions • Linux

Roles & Responsibilities:

- Designed containerized deployment using Docker and Kubernetes.
- Created Kubernetes Deployments and Services for application delivery.
- Implemented GitHub Actions CI/CD and integrated GitHub source control.
- Managed configuration/environment variables and used kubectl/Linux for troubleshooting.
- Documented architecture, deployment workflow and troubleshooting procedures.

PROJECT #2 — KUBERNETES APPLICATION PLATFORM

Role: Kubernetes / DevOps Project Engineer | **Environment:** Kubernetes • Helm • Docker • PostgreSQL • Redis • Minikube

Roles & Responsibilities:

- Designed and configured Kubernetes Deployments and Services for a multi-component application.
- Used Minikube and Docker for the development environment.
- Packaged application configuration with Helm.
- Integrated PostgreSQL and Redis and practiced service discovery.
- Used kubectl to inspect resources, test deployments and troubleshoot runtime/configuration issues.
- Documented architecture and deployment procedures.

PROJECT #3 — SECURE MESSAGING APPLICATION

Role: Full-Stack / Security Project Engineer | **Environment:** FastAPI • React • Vite • Cryptography • REST API

Roles & Responsibilities:

- Developed FastAPI backend services and React/Vite frontend functionality.
- Implemented cryptographic functionality for secure message handling.
- Designed REST API communication between frontend and backend.
- Managed environment variables, tested workflows and troubleshoot integration/deployment issues.

PROJECT #4 — MACHINE LEARNING PREDICTION PLATFORM

Role: Software / Cloud Project Engineer | **Environment:** Python • Machine Learning • JavaScript • Vite • Cloud

Deployment Roles & Responsibilities:

- Developed prediction functionality and integrated it with a web interface.
- Connected frontend components with application services and deployment configuration.
- Prepared and deployed the application using cloud hosting infrastructure.
- Tested functionality, investigated deployment issues and documented the workflow.

PROJECT #5 — MINI COMPILER

Role: Compiler Engineering Project Developer | **Environment:** Python • FastAPI • React • Compiler Engineering

Roles & Responsibilities:

- Implemented lexical analysis and parsing concepts.
- Developed FastAPI backend functionality and interactive React frontend.
- Connected frontend components with compiler-processing functionality.
- Tested inputs, troubleshoot implementation issues and documented architecture.

PROJECT #6 — ENTERPRISE JAVA E-COMMERCE APPLICATION

Role: Java Backend Developer — Academic / Independent Project | **Environment:** Java • Spring Boot • REST API • SQL

Roles & Responsibilities:

- Developed backend services using Java and Spring Boot.
- Created REST API endpoints and worked with product/application data.
- Tested API functionality, troubleshoot backend issues and practiced enterprise application architecture.

ADDITIONAL SOFTWARE ENGINEERING PROJECTS

Network Packet Analyzer — Networking • Programming | **Finite Automata Simulator** — React • TypeScript • Vite | **Microprocessor Emulator** — Computer Architecture | **Data Structures Visualizer** — JavaScript | **College Database Management System** — SQL • Web Application

DEVOPS & CLOUD ENGINEERING PRACTICE

AWS fundamentals • Terraform IaC • Docker containerization • Kubernetes deployment • Helm packaging • GitHub Actions CI/CD • Linux/Ubuntu administration • Git/GitHub

• application deployment and troubleshooting • configuration management • cloud-native architecture

ENGINEERING PROFILE

GitHub: github.com/sathwik-svg | **Portfolio:** portfolio-wuht.onrender.com | **LinkedIn:** linkedin.com/in/sathwik-ganji-a80b143b5/

TECHNICAL ACTIVITIES & ACHIEVEMENTS

- Built multiple academic and independent software engineering projects.
- Developed hands-on cloud and DevOps projects using modern infrastructure technologies.
- Practiced Kubernetes deployment, container orchestration, CI/CD and Terraform concepts.
- Maintained technical projects and source code using Git and GitHub.

LANGUAGES & CAREER TARGET

Languages: English — Professional Working Proficiency | Telugu — Native | German — Basic/Learning

Target Roles: Cloud Engineer • Junior Cloud Engineer • DevOps Engineer • Graduate DevOps Engineer • Cloud Support Engineer • Platform Engineer • Junior SRE

Long-Term Direction: Cloud Engineering → DevOps / Platform Engineering → Cloud Architecture
